

The Castle

Devon was a five-year-old when he learned that those headaches he was having were the result of a cancerous tumor behind his eye. But thanks to his family and good doctors, he survived. Or did he? The Castle is the story of his reminiscences, especially of the crystal chess set he got as a gift after his surgery. But then one of the pieces fell to the floor and shattered. Which piece? The castle, or rook as some call it. Suddenly, Devon awakens in a strange land where he finds a real castle - and some of the same people he knew in his childhood. What is real and what is not? Is he alive or dead? Its a story that will keep you wondering.
