

Francis Crick: Discoverer of the Genetic Code (Eminent Lives Series)

Part of the acclaimed Eminent Lives series, Francis Crick is the first biography of the eminent scientist, co-discoverer of the double helix structure of DNA. Written by Matt Ridley, the award-winning author of the national bestseller *Genome*, Francis Crick traces his life from middle class mediocrity in the English Midlands through a lackluster education and six years designing magnetic mines for the Royal Navy to his leap into biology at the age of 31 and his enormous success, providing a considerably more complete and colorful portrait of Crick than has existed before. (New York Times)
