

Nile in Denial

Nile in Denial is a book about the challenges and rewards of embracing change both physically and metaphorically. Nile is a stubborn caterpillar who resists change in all aspects of his existence until one day he meets an adventurous caterpillar who predicts the greatest transformation of his life! Dealing with this transformation forces Nile to break out of his comfort zone and work past his denial. After all, the one consistent thing in life is change. The book is an excellent learning tool for exploring what adaptation means in our own lives as well as a lesson in metamorphosis.
